

THE ACCELERATOR

Own the capacity. Keep the margin.

Dedicated port capacity to high-demand destinations at a floor rate below the observed market. Your floor sets the cost of each minute carried. What is realised above it is your margin - whether you run the traffic yourself or appoint Minutes Network to resell your capacity.

Two

WAYS TO USE

THE OPPORTUNITY

Own the capacity. **Keep the margin.**

Wholesale telecom has historically required relationships, scale, infrastructure and expertise. **Minutes Network opens access.**

THE MARKET

International voice traffic depends on wholesale capacity bought and sold across destination-specific routes.

THE ACCESS

Volume commitments give Minutes Network access to rates that smaller commitments typically don't get.

THE OWNERSHIP

You own dedicated capacity - ports on one international mobile corridor - and you choose how to use it.

THE MARGIN

What is realised above your floor is your margin.

THE NETWORK

Activity runs through and supports Minutes Network - visible on the public explorer.

YOUR SIDE OF IT

Own the capacity

Dedicated ports on a high-demand destination, at a per-minute floor set below the observed market. It is yours for the full 10-year contract term.

Run it, or we resell it

Terminate your own traffic and pay just the floor, or appoint us to resell your capacity. In either mode, what you realise above your floor is your margin.

Keep the full margin

When a carried minute realises above your floor, the resulting margin accrues to you. Minutes Network earns a separate share on the sale - never taken from your margin.

WHERE THE MARGIN COMES FROM

RATE REALISED WHEN MINUTES ARE SOLD

THE DIFFERENCE IS YOUR MARGIN

YOUR FLOOR - YOUR COST PER MINUTE

YOUR MARGIN

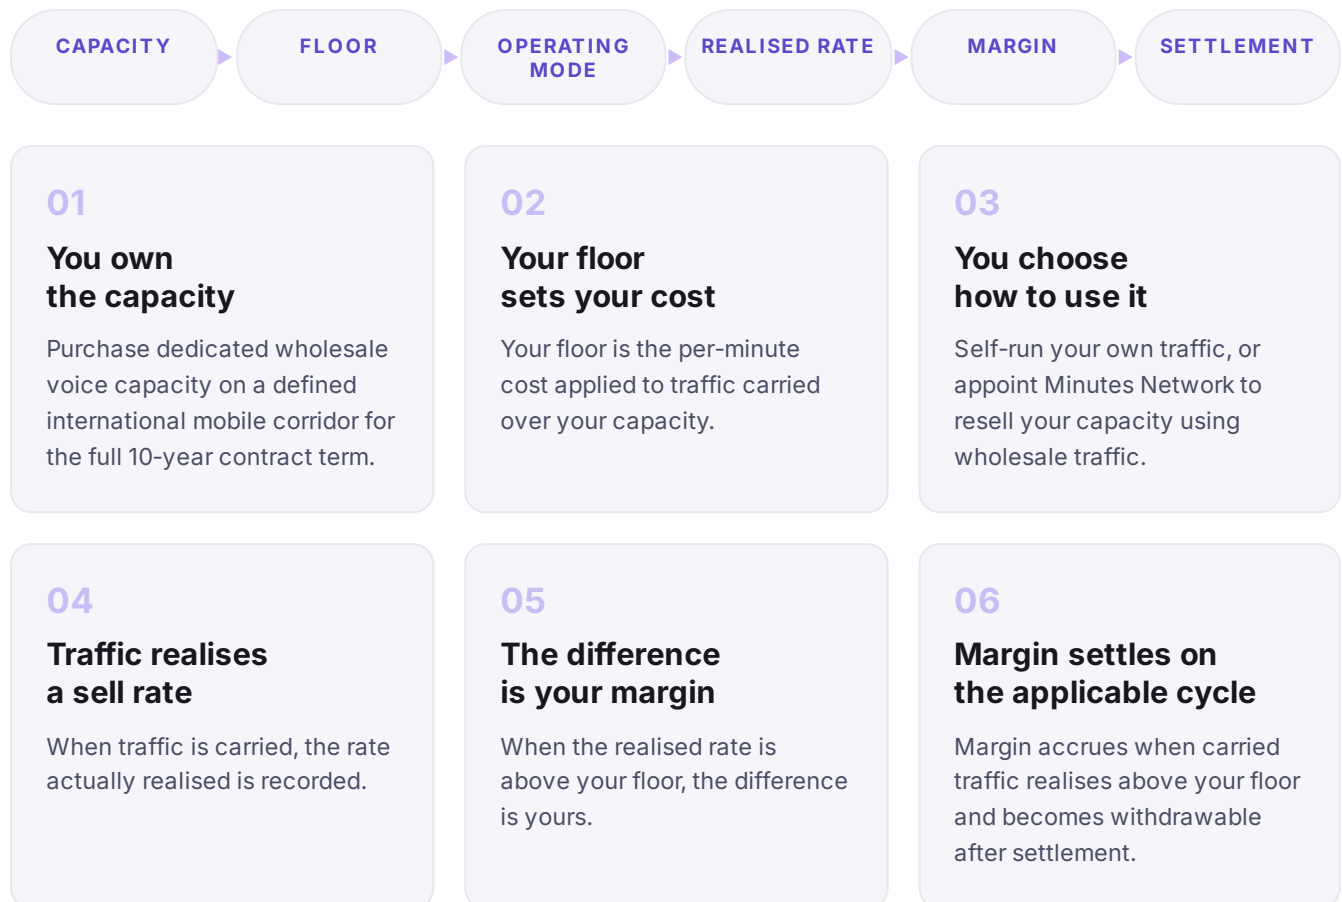

Your floor sets the cost of each minute carried. **When traffic is sold above that floor, the difference is your margin.**

We haven't invented those economics. We've opened up access to them.

HOW THE ACCELERATOR WORKS

The mechanism, in six simple steps.

One purchase gives you dedicated capacity. Everything after it follows the same sequence.

Own the capacity. Your floor sets the cost.
What is realised above it is your margin.

YOU CHOOSE HOW IT IS USED

Run it yourself, or we resell it.

SELF-RUN - YOU FILL YOUR PORTS

Have your own traffic? Send it over your ports. Your floor sets the cost of every minute carried. **What you realise above it is your margin.**

RESALE - WE RESELL YOUR CAPACITY

Appoint Minutes Network to resell your capacity using our wholesale traffic. When carried minutes realise a rate above your floor, the resulting Resale Margin accrues in your portal. **No telecom operation is required on your side.**

FIVE CORRIDORS AVAILABLE

CORRIDOR	ENTRY FROM	ENTRY FLOOR	OBSERVED SELL RANGE	ENTRY SPREAD VS FLOOR
Mexico +52 FROM \$1,094				
Colombia +57 FROM \$1,850				
Pakistan +92 FROM \$2,310				
Jamaica +1876 FROM \$3,528				
Albania +355 FROM \$5,425				
Mexico	\$1,094	\$0.00729/min	\$0.00746 - \$0.0090	+2.33%
Colombia	\$1,850	\$0.00411/min	\$0.0042 - \$0.0100	+2.19%
Pakistan	\$2,310	\$0.0308/min	\$0.0315 - \$0.0471	+2.27%
Jamaica	\$3,528	\$0.2352/min	\$0.24057 - \$0.2831	+2.28%
Albania	\$5,425	\$0.36164/min	\$0.3699 - \$0.6380	+2.28%

Every row above shows that corridor's entry package. Sell ranges are observed market data, not a promise. Spread vs floor is calculated as (observed market low - floor) ÷ floor. Actual realised rates and carried traffic can vary. Bigger commitments carry lower floors, which increases the displayed spread versus the current observed market low.

Market snapshot: 20 August 2026. Current pricing and availability are shown at minutesnetwork.io/accelerator.

ONE CORRIDOR IN FULL - MEXICO · Every floor shown is below the current observed market low of \$0.00746/min.

COMMITMENT	CAPACITY	MAX / DAY	YOUR FLOOR	SPREAD VS FLOOR
\$1,094	10 ports	5k min	\$0.00729	+2.33%
\$5,460	50 ports	25k min	\$0.00728	+2.47%
\$61,020	150 ports	75k min	\$0.00678	+10.03%
\$203,100	500 ports	250k min	\$0.00677	+10.19%

SETTLEMENT AND PAYOUTS

Margin accrues live. Withdraw after settlement.

01

Margin accrues live

Every carried minute and realised rate is recorded in your portal as traffic flows. Margin accrues when the realised rate is above your floor.

02

Settlement cadence

Settlement timing depends on the applicable traffic agreement. Longer carrier settlement cycles can support different wholesale rate structures.

03

Withdraw settled balances

Once a balance becomes withdrawable, payout can be requested by bank wire or USDC, subject to the applicable minimum and processing terms.

THE DEAL, IN SHORT

CONTRACT TERM	10 years from activation, subject to the full terms of the purchase agreement.
CAPACITY	Up to 500 minutes per day per port on a practical basis (peak-hour and ASR adjusted).
GO-LIVE	Interconnect details are issued within 2-3 business days and traffic can begin ramping from there. Operational ramp-up typically completes within 7 days; Tier-1 packages can take up to 28 days.
YOUR MARGIN	When the realised rate is above your floor, the difference is your margin.
TRANSFER	A transferable contractual right to telecom capacity.
PAPERWORK	A purchase agreement on every order, a numbered invoice at activation.

PAY IN, PAY OUT

PAY IN

Bank wire (unique reference per order), cryptocurrency across Bitcoin, Ethereum, BNB Chain, Solana and Cardano - detected on-chain automatically.

PAY OUT

Bank wire or USDC. Margin settles on the applicable cadence - monthly for entry sizes; the largest packages run on the four-month Tier-1 cycle.

ON THE NETWORK

Traffic runs over the Minutes Network DePIN - DePIN fees are paid as normal, and traffic is visible on the public explorer.

LEGAL AND REGULATORY

Disclaimer

Full and binding terms are set out in the purchase agreement.

01

The Accelerator does not provide telecommunications, VoIP, telephone or other electronic communications services to end users or subscribers. We do not operate or maintain telecommunications networks for end-user access, and we do not provide telephone numbers, subscriber connectivity or retail voice services.

02

The Accelerator provides access to contractual wholesale capacity arrangements for commercial use or resale. Any underlying telecommunications or voice termination services are provided through the relevant telecommunications carriers or service providers. The Capacity does not constitute a telecommunications service provided by the Accelerator to the purchaser or any end user.

03

The purchaser is solely responsible for ensuring that its use or resale of the Capacity complies with all applicable telecommunications, licensing and other regulatory requirements in the relevant jurisdictions.

THE ACCELERATOR

Own the capacity. Keep the margin. Accelerate the network.

Accelerator capacity runs on Minutes Network. More carried volume means more network activity. More carried traffic feeds Hyperscaling, Jingle expansion and wider Minutes Network utilisation, with applicable network fees paid as normal and traffic visible through the public explorer.

Jingle termination applies where an endpoint is available and is never guaranteed for any given call, corridor or period.

OR BANK WIRE

Stated plainly. Accelerator is a purchase of telecommunications capacity - not a deposit, security or investment product. Accelerator does not provide telecommunications services to end users - underlying voice termination is provided through the relevant carriers or service providers. Observed wholesale rates are market data and do not represent guaranteed utilisation, resale performance, margin or return. Identity verification and anti-money-laundering checks apply to every purchase. Traffic runs over the Minutes Network DePIN, applicable network fees are paid as normal, and activity is visible through the public explorer. Full and binding terms are set out in the purchase agreement.
